Skills

Python

Docker

CI/CD

Git

- Working in a team
- Problemsolving
- Maintaining stress
- Constant self-development

MongoDB

Instrumentation

Monitoring

English - C2

- Finding new challenges
- Analytical thinking
- The ability to adapt and learn new skills quickly

Additional skills:

- Category B driver's license
- Understanding of Linux and Mac based systems, Terminal workflow
- Basic understanding of AWS, Azure systems
- Knowledge in: Django, FastAPI, poetry, pytest

About me

My goal is to become a professional architect in the programming field. I strive everyday to get to know new things in my field of interest. I feel like you can always learn something new and become a better version of yourself, that is why the language I code in is not of utmost importance, it is rather a matter of quickly adapting to the given scenario and utilizing all the skills I have learned to push myself and others beyond.

Education

BS in Computer Science

10.2021 – 03.2025

Collegium Da Vinci

Information Technology

09.2016 – 06.2020

**Technikum ekonomiczno-administracyjne
im. Stanisława Staszica**

- Education – Professional Experience

Work Experience

Apprenticeship

07.2022 – 08.2022

Blulog | Golang Developer / Fullstack

- Golang backend workflow (Gin)
- RESTful API utilization
- VueJS frontend development
- Creation of interactive website objects, connection and data transportation between backend and frontend

Internship

09.2022 – 12.2022

WithSecure | Python Software Engineer

- Python Software Engineering
- Creating tests with Pytest
- Git versioning for projects with Bitbucket
- Jenkins Pipeline
- JIRA
- Work connected with Cybersecurity systems
- XDR system workflow
- Working with Drools language

Internship

03.2023 – 06.2023

MH Sp. z.o.o. | Big Data Intern

- Postgres Database querying
- PHP Backend Development
- Git versioning for projects with Bitbucket
- Jenkins Pipeline
- JIRA Workflow
- Kanban Boards
- Linux-based systems

Certificates

- E14 – Web Application and database development and administration
- E13 – Local Network design and administration
- E12 – Building and Installing PC's and other IT devices
- FCE – B2 English Certificate – British Council

Interests

- Breakdancing
- Creating and learning about Neural Networks/Machine Learning, designing backend systems.
- Self-improvement
- Music – Playing drums
- Maintaining physical credibility (bouldering)

Part-time position 06.2023 – 09.2024

Junior Backend Developer

- Backend Development
- OOP in PHP revolving around data models, Active Directory
- Postgres Database querying, model manipulation and implementation with PHP
- Creation of new functionalities on web app
- Bootstrap
- Elastic Search
- Neo4j
- AJAX
- Git versioning for projects with Bitbucket
- Jenkins Pipeline
- JIRA Workflow
- Yii2 Framework
- Selenium
- Xpath

Full-time position 08.2025 – current

Graduate Backend Engineer

- Python Backend Development
- Designing systems and integrations within Python projects
- Migrating Python 2 projects to Python 3
- Creating API implementations
- Pytest test suite coverage
- Dockerizing software
- Kubernetes instrumentation
- Makefiles
- RabbitMQ
- Scrum/Agile workflow
- ElasticSearch
- New Relic monitoring and dashboarding
- FastAPI, Flask, Cherryypy
- MongoDB, PostgreSQL
