

Mikołaj Bigaj

Python Backend Engineer

Poznań area, Poland · mikolaj.bigaj.00@gmail.com
linkedin.com/in/mikolajbigaj · github.com/MBigaj · mbigaj.github.io

CORE STACK Python · FastAPI · Django · PostgreSQL · MongoDB · Kubernetes · Docker · Git

Python backend engineer at YouGov with a Computer Science degree. I design, build and migrate backend services, and have worked across a range of programming languages, databases, deployment systems and analytical tools. Day to day that means Python on PostgreSQL and MongoDB, shipped with Docker, Kubernetes and CI/CD.

01 EXPERIENCE

Aug 2025 – present — **YouGov** · Warsaw · Full-time

Associate Backend Engineer PROMOTED — Aug 2026 – present

- Sole lead and contributor on migrating a whole service from AWS Lambda to containers on Amazon ECS, with scalability, logging and latency in scope.
- Part of a two-developer team migrating a large project from Python 2 to Python 3, ensuring compatibility, code quality and security.

Graduate Backend Engineer — Aug 2025 – Aug 2026

- Sole contributor on a new API layer that bridges a website client and an LLM API to bring AI chat to the site: it adapts model responses and is built to scale, with a singleton requests client and per-request rate limits and timeouts.
- Sole lead and contributor on migrating a service from RPC to an API; fully retired the RPC service, covering security, access protection and data handling.

- Built an AMQP consumer on RabbitMQ that conveys alerts across applications.
- Day to day: FastAPI, Flask and CherryPy services on MongoDB, PostgreSQL, Redis and Elasticsearch; pytest, CI/CD, Docker, Kubernetes, New Relic monitoring.

Mar 2023 – Oct 2024 — **MH Sp. z o.o.** · Poznań

Junior Backend Developer · Part-time — Sep 2023 – Oct 2024

- Built backend features on a very large PostgreSQL data structure used with NLP systems.
- Designed data models and queries; ran cron jobs and scripts that process the data in batches.
- Developed the system structure and covered the work with unit tests.

Big Data Intern · Internship — Mar 2023 – Sep 2023

- Big data tasks with PostgreSQL migrations and querying.

- Stack: PHP (Yii2), PostgreSQL, Elasticsearch, Neo4j, Selenium, Jenkins, Linux.

Sep 2022 – Dec 2022

WithSecure · Poznań

Data Scientist Intern · Internship

- Sole engineer on a project to rewrite rules from a Drools-based system into an open-source language: worked out the design and started the implementation in Python.
- Wrote pytest tests and worked with Jenkins pipelines on cybersecurity (XDR) systems.

Jul 2022 – Aug 2022

Blulog · Poznań

Full-stack Developer · Apprenticeship

- Owned a QR reader feature for the web and mobile applications and shipped it to production: Go (Gin) REST backend, Vue.js frontend.

02 SKILLS

Backend	Python, FastAPI, Django, Flask, CherryPy, REST APIs, pytest, NumPy
Data and messaging	PostgreSQL, MongoDB, Redis, RabbitMQ (AMQP), Elasticsearch
Infrastructure	Docker, Kubernetes, AWS (Lambda, ECS), CI/CD, GitLab, GitHub, Git, New Relic, Makefiles, Poetry
Working knowledge	Go, React, Vue
Ways of working	Agile, Kanban, sprint planning, team leadership (degree project, team of four)
Languages	Polish (native), English (fluent, professional working language)

03 EDUCATION

Oct 2021 – Mar 2025

BEng in Computer Science

Collegium Da Vinci
